

2017 Department of Biology Awards

ELDON J. GARDNER RESEARCH SCHOLARSHIP

Alex Tolman, Biology

I am a Biology major with a Human Biology emphasis and a Chemistry minor. My plans are to graduate in the spring of 2019 and attend medical school after I graduate. I attended Salt Lake Community College for two semesters and was on the President's list for both semesters before I transferred to Utah State. When I transferred to Utah State last fall I was awarded the Transfer Presidential Scholarship. Currently, I volunteer in the emergency department at Logan Regional Hospital, am an undergraduate assistant for Human Physiology, and teach English to Spanish-speaking immigrants. I am also doing research on a group of enzymes called protein tyrosine phosphatases in the Hengge lab here at Utah State. In my free time I enjoy skiing, traveling, and going to concerts.
