

GORDON J. CHRISTENSEN SCHOLARSHIP

SEAN CHRISTENSEN

BIOLOGY, JUNIOR

A few things about me:

I am a junior, pursuing a bachelor's degree in biology with a minor in Chemistry. Both of my parents helped to instill within me a love for different areas of the biological sciences. I have a deep interest in biomedical fields of study and genetics. It is very exciting for me to delve into these areas and learn about the miracle of life all around us.

I am pursuing a career in dentistry. I love to interact with and create relationships with others. I also thrive in working with my hands; those close to me will tell you that I always have some kind of project I am tinkering with. Most importantly I am deeply curious and love to learn. I volunteer much of my time with my religious organization in helping our community to become even better. I am happily married. My wife is also a student at Utah State. In our spare time we love to go out and enjoy nature. Camping, hiking, fishing, and biking are a few of our favorites. I work at the Aggie Connections Phonathon, helping to raise funding for the university and as a CNA. I look forward to getting involved in a research lab in my remaining years here at Utah State. Go Aggies!
