

Thomas L. Bahler Scholarship recipient:

John Evans

Biology Major, Chemistry Minor, senior

A few things about me:

I am a senior at Utah State University as a Biology major, Biology emphasis, and a Chemistry minor. I received an Associate's degree from Weber State University, after which I transferred up to USU. While attending Utah State, I have joined both the Pre-Health Club, as well as the Chem Club. I volunteer at Logan Regional Hospital, and am also actively involved in my faith. I feel that Utah State has offered better opportunities to learn, be academically competitive, participate in extra-curricular activities, and grow personally. I have a goal to be debt-free until I reach medical school, and have been true to that goal up to this point. I hope to use this scholarship to further my education as I pursue medical school and the ensuing medical career!
