

Department of Biology Scholarship

Brian Langston

Public Health – Industrial Hygiene, Senior

A few things about me:

I have loved my education at Utah State and look forward to continuing my education here. I am studying Public Health with an emphasis in Industrial Hygiene and have minors in Biology and Chemistry.

My highest priority in academics is to become a professional. I am a member of the USU Pre-Dental Club as well as the Industrial Hygiene Club to become more involved with other students who are self-motivated and goal oriented. I am also a volunteer in Dr. Bernhardt's research lab and enjoy the lessons I learn there. I have experienced great happiness as I have excelled in academics and feel that I am becoming a well-rounded person.

The next few years are vital to my long-term goal of becoming an orthodontist, and receiving this scholarship benefits me tremendously as I prepare for dental school interviews in the coming year. I look forward to the challenge of preparing myself for graduate school which will enable me to make an impact in others' lives.
