

*John R. Simmons Scholarship*

**Cole W. Chambers**

Biology, Senior

A few things about me:

Over the past three years I have had the opportunity to study the field of Biology here at Utah State University. I particularly found an interest in studying the human body. This interest has led to a desire to further my education in the pharmaceutical industry. In the summer of 2014, I was awarded with my National Pharmacy Technician License; an accomplishment that will allow me to gain critical insight into the field of pharmacy.

Graduating from Utah State University has always been a dream of mine that is finally becoming a realization. Reflecting upon previous years of schooling, I have always held myself to high expectations and will continue to strive to graduate with a 3.8 or higher overall GPA. I have high hopes that my educational success and personal accomplishments will allow me to attend pharmacy school. Beyond pharmacy school, my ultimate goal is to return here to Cache Valley and use my knowledge to serve a community that has given me so much.

This scholarship allows me to focus on the accomplishment of my goals. With the aid of this scholarship, I honestly feel that I am closer to fulfilling my dream of attending pharmacy school. The John R. Simmons Scholarship will motivate me both academically and individually as I attend my last two semesters at Utah State. Financially, I will have a great opportunity to put away and save money for pharmacy school. It is hard to put into words how grateful I am for the Simmons Family; I will forever strive to follow their excellent example of service and friendship.
